### **СЕМИМЕРНЫЕ СПИНОРНЫЕ АЛГЕБРЫ**

В работе рассмотрены вопросы построения семипараметровых унитарных унимодулярных  $SV_6$ -преобразований ( $6 \times 6$ ) по отношению к 7-спинорам первого ранга для фундаментального набора из шести компонент, являющихся подгруппой  $SU_6$ -группы. Найдены генераторы бесконечно малых преобразований и отдельные соотношения связи между ними. Эти операторы дают при серьезной близости свойств  $SU_3$ -симметрии существенные отличия.

Здесь символом  $\psi^{ijk.1}$  обозначена сумма вида  $\psi^{ijk.1} = \psi^i + \psi^j + \psi^k - \psi^1$   
 Две пары этих уравнений можно записать в виде уравнений (Дирака)

$$\left. \begin{aligned} (p^0 - p\sigma)\psi &= m\phi \\ (p^0 + p\sigma)\phi &= m\psi \end{aligned} \right\}$$
